ABSTRACTED-PUB-NO: JP 58209508A

BASIC-ABSTRACT:

Wood veneer sheet is impregnated with an aq. soln. of water soluble urea/melamine resin and/or melamine resin blended with phenol resin, laminated with substrate board in the presence or absence of an adhesive layer and hot pressed to provide resin-reinforced wood panel.

Phenol resin enhances the penetration of the aq. soln. of the resin into the tissue of veneer and urea/melamine resin and/or melamine resin reinforces the surface of wood veneer to improve the surface hardness and to prevent cracking and peeling without significant increase in the processing costs.

Process strengthens the soft veneer of Oregon pine to prevent cracking and peeling of veneer sheet.
